We are delighted to confirm, with the appointment of our new caterer, Independent Catering, not only will our school food be improved and great value, but the technology for the cashless system will be updated to a proximity contactless fob which can be placed on pupils key rings. This move will stop pupils having to touch a pad, instead recognising the fob rather than their finger. The contactless proximity fobs will be issued on the first day of term and linked to peoples cashless accounts online. Fobs are linked to pupil photographs so can only be used by the pupil they are issue to.

This move will speed up queues and stop contact of fingers at the tills.

The initial fob is free, with replacement fobs charged at £3, so please ensure they are placed on a keyring!
